

Documentation

This is full tutorial about how to use MicroParser software. Here you can see all possibilities of the software and variations of how you can use it.

1. Enter dialog

This is main window for enter in the software – depend on what license key will be entered will be different parser product – if you have your paid license key enter it here and press circle button to enter.

You can enter product name to login in trial mode to try product (example: yellowpages.com) – product name you can see on product page on the site: <u>http://microparser.com</u>

All available software product you can see on the product box on the site http://microparser.com

2. Main product window

On the main product window you can see on the right information about current product: product name, and product box image. If it is trial version you will see specific text and link to buy license key for current product.

creative innovation in parsing solutions

It's the easiest way to spinup your business online in minutes

view. Depend on selected tab will be used different data for parsing.

Stop

Start parsing

Stop button will stop parsing process and allow you to export result table

Resume button allow you to continue parsing from stopped position after click stop button.

Clear button allow you to clear result table.

Get email from site Get email from site check box – if is selected : will try to get email from company web site if there is no result on the parsed web site.

For example: if we have line from yellowpages.com with web site: stanchavis.com but no email – application will try to find email on the web site: stanchavis.com and will put it : stan.chavis.bwij@statefarm.com

602 Bel Air Blvd Ste 21,		Auto Insurance	(251) 473-7150	stan.chavis.bwij@statefarm.com	http://www.stanchavis.com								
🗌 Auto save	csv 🔹		Auto save allow you to select folder for result table export in automatic mode. Yo										
	CSV	can selec	t export data fo	ormat CSV, XLS, HTML, XML and	data will be automatically								
	EXCEL	saved ev	saved every 50 000 lines- in separated file and last file after capture finished.										
	HTML	lt is verv	It is very useful if you what to parse all web site data for example.										
	XML	it is very	useru ni you m		examplei								

yp

You have 4 buttons for fast export result table in EXCEL, HTML, XML, CSV – depend on format what you need.

You need to use them for export if you do not use auto save.
